PRAGATI : SUSTAINABLE AGRICULTURAL LAND DEVELOPMENT AND SKILL DEVELOPMENT TRAINING AND FORMATION

SUPPORTED BY: MANOS UNIDAS

Beneficiaries

- **Direct beneficiaries:** The direct beneficiaries will be 1800 people from 300 households.
- **Indirect beneficiaries:** The indirect beneficiaries will be 7094 people from the six target villages.

GOALS & OBJECTIVES OF THE PROJECT:

1. Overall Objective / Goal

The overall objective of the proposed project is to eradicate hunger and malnutrition in 300 tribal and backward class households through sustainable agricultural training and practices.

2. Specific Objective (SO) The specific objective is to help 60 most underprivileged families develop their agricultural land into better income generating resources and to train the youth of these families for future livelihood jobs.

1. Improved agriculture through sustainable organic farming

Sr. No.	Name of the Training	Trainings	Participant
1.	Formation of farmers' groups & follow up	03	60
2.	Training on sustainable organic agriculture	03	60
3.	Training on organic pesticides	02	60
4.	Training on organic fertilizers	02	60
5.	Interface and networking with the Government departments & linking various Schemes to the farmers	01	60
6.	Setting-up vermi compost & jivanmukta pits	02	60
7.	Distribution of seeds	02	60

2. Empowered women & improved their economic capacity through Income generating activities, to make a change in their lives

Sr. No.	Name of the Training	Trainings	Participant
1.	Formation & strengthening of SHGS	02	120
2.	Training on government schemes for women	02	120
3.	Training on health & hygiene for women	02	120
4.	Training on nutrition & kitchen gardens for women	01	120
5.	IGPs : Small scale activity of nutrition & kitchen gardens	06	120
6.	IGPs: goat rearing & poultry farming		120

3. Empowered youth girls & improved their economic capacity through Skill development

Sr. No.	Name of the Training	Trainings	Participant
1.	Formation & follow up of Adolescent Group	02	60
2.	Training on Gender Discrimination & Right of Women		60
3.	Training on Health & Hygiene	02	60
4.	Skill Development for Girls	Regular	60

5. Facilitated access to education to children.

Sr. No.	Name of the Training	Village	Participants
1.	Regular supportive classes at village level	Regular	290

PROJECT TITLE : JEEVAN – EMPOWER ANIMATION

SUPPORTED BY : CARITAS INDIA, MISERIOR

Project Area : 16 Villages

12 villages from the Chikhaldara cluster and 4 villages from the Dharni cluster.

Outcomes:

1.1. Community will ensure the political education program by increasing community demands for local development by their own.

- Community contributed with Rs. 6000/- for replacement of electricity cable in Nanduri Village.
- 1047 Meter C.C. Road is constructed in program villages during reporting villages.
- 42 women trained through livelihood skilled with tailoring course.
- Through the PRI initiatives 100 meter Pipeline repaired in Badnapur village.
- 472 Meter canal repaired and constructed in program villages
- 115 people received work with the support of forest management committee in local area.
- Electricity DP is repaired and continues electricity supply in Dobanbarda, Kalapani and Badnapur village which was stopped for 8 days.
- 14 new electricity polls for domestic Supply placed program villages as per the demand of Community.
- 6 new street lights placed as per the demand of villagers in program villages.
- Korku Community Hall is constructed in Ramtek village.

1.2. Community will have greater say in setting the agenda of Gram Sabha

- 62 issues identified by the community during this reporting period.
- 62 applications submitted by community.
- 26 issues solved by PRI initiatives.
- 16 issues solved by committee's initiatives.

1.3. Community led MGNREGA implementing benefiting 1000 households.

- 3953 people submitted demand and doing work in MGNREGS in program villages.
- 2156 people received work under MGNREGA in the program villages.
- 97 people received new Job Cards in the program villages.
- 30 Farmers benefitted by the Land Treatment Activities through MGNREGA work.
- 140 Soak Pit constructed by community in program villages.
- Gram panchayat planted 4000 sapling through the social forestry scheme.

1.4. Community improved quality of implementation of schemes with follow-up.

- 134 Families received Housing Schemes in the program villages.
- 8 people received Teen Sheet by the Tribal Development Project Office.
- 33 Farmers received fodder Seed by the Agriculture Department.

- 21 Senior Citizen enrolled and received first installment of Old Age Pension Scheme.
- 7 Farmers received Fodder Cutter Machine by Tribal Development Project Office.
- 38 Families received New Ration Cards in program villages.
- 411 Farmers received Rs. 2000/- each through PM Sanman Yojna in program villages.
- 4 Farmers received Sprinkler set by Tribal Development Project Office.
- 130 Farmers received Vegetable Seed by Agriculture Department.

1.5. At least 3 community led networks initiated with the support of other agencies

- 6 Farmers received Organic Repellent by the Agriculture Department through the Networking.
- 5 Self Help Group received Rs. 100000/- each as IGP loan.
- 30 Children received Steel Drum by the World Vision through the networking.
- 150 farmers benefitted by receiving farming kit through the networking with KVK, Akola.
- 261 Livestock Owners benefitted by vaccination for their livestock by Animal Husbandry Department.

2.1. Women lead farmers facilitate other farmers for food security.

- There are 6 women led farming Facilitators for supporting other women farmers.
- There are 36 women farmers practicing farming in the program villages.
- 8 Women Farmers use Vermin Compost in their land.
- 14 Women Farmers did Seed Germination process before sowing in this season.

2.2. Community starts reviving indigenous seed and mix cropping.

- 12 farmers stored their indigenous seed with traditional storage system.
- 36 Women farmers and 82 Men farmers are promoting mix cropping in this land.
- 45 Farmers use traditional and stored seed for sowing in this season.

2.3. Community promoted alternative livelihood and horticulture.

- 39 families are practicing Nutritional Garden in the community.
- 2 Men and 3 women are promoting vegetable garden on commercial basis.
- 2 people opened new petty and Bangles shop in Kalapani and Badnapur village.
- Livestock as traditional earning source for 37 families those are earning by selling milk.
- 18 Farmers are practicing Horticulture in their land.

2.4. Community promoted Sustainable Agriculture Practices.

- 18 farmers spread Cow Dunk manure in their land.
- 118 farmers including Women promote Sustainable Agriculture Practices.
- 8 farmers are promoting organic inputs and vermin compost on the commercial basis.

3.1. Community access the various forests Produced.

- Farmers group took contract of Local Pond for fishing by paying Rs. 38000/- in the Panchayat.
- 24 Farmers received Land Patta in the Program village. (14 farmers from Nanduri, 4 from Sosokheda and 6 from Jambu village)
- 2 families received land for house building with document in kara village.

- 284 Families earned good income by collection of MAHUYA flowers into the forest and local land.
- 10 people received bass cutting work by the forest department.
- 68 people received Tendu Leaves collection work for 8 days on 275/- per day's wages. (Total amount 149600/-)
- 45 families earned good income by selling the Amla of the forest area.
- 68 Families collecting and storing Mahuva Seed for Edible oil preparation.

ACTIVITY PHOTOS

PROJECT : INTEGRATED FAMILY DEVELOPMENT PROGRAM

Aims and Objectives:

- To meet the basic needs of the poor families.
- To encourage them to move towards self-reliance in order to become contributing members of their local society.

The Main programs undertaken through SAFFP are:

- Housing and Livelihood enhancement
- Livestock farming (Goat Rearing, Cow Rearing, Poultry farming etc...)
- Small Business Activities
- Education
- Medical Support

Activities

- **Preparation of the letter to the Donors:** The letters are written every year. It helps the donor to understand more deeply about the partner family and how their contribution helped the family to achieve their goals. The beneficiaries can also express their love and gratitude for their generosity through their letters.
- **Cluster Level Meeting:** These meetings help the women to understand better and actively participate in every activity as it is being conducted in their own village. This motivates them to share their knowledge with other women as well as practice at home. There is a positive behavioural change we can see in them.
- **EDP training:** This training program helps the beneficiaries to know about the project, its main aims and objectives, its function, about the benefactors, and also the functions of the NGO's at the local level.
- **Family visits, Fund Disbursement and Income Generation Activities:** Regular monitoring visits by the coordinator are being conducted in order to verify the success of the income generation activities and family development. These livelihood initiatives have brought gradual development in the family.

Detailed view of Service provided to the Beneficiaries

Sr.No	Programs Undertaken	No. of families Received support	Total Amount
1.	Small Business Activities	54	Rs.862554/-
2.	Construction of Sanitary Latrine	13	Rs. 246177/-
3.	Housing	69	Rs. 1478318/-
4.	Livestock farming	160	Rs. 3055971/-
5.	Livestock Infrastructure	07	Rs. 133378/-
6.	Medical support	01	Rs. 17492/-
		Total	Rs. 5793890/-

**PROJECT : SABAL: AN INTEGRATED FOOD AND NUTRITION SECURITY
PROGRAM FOR THE KORKU**

SUPPORTED BY : CARITAS INDIA

Objective A: Households in Melghat-Block in Amravati-District in Maharashtra, belonging in the majority to the ethnic minority of Korkus, have improved their food security and quality of nutrition by diversifying their agricultural production and improving their production methods.

No	Indicator	Result Achieved
1.	No. of household reported increase in food crop production & income	1311
2.	No. of household reported adequate food availability for at least 8 - 10 months.	683
3.	No. of farmers who shifted from cash crop to food crop cultivation.	836
4.	% of farmers who have revived/extended traditional crops.	836
5.	No. of farmers who practice IPM and INM measures promoted by SABAL.	886
6.	Area of land brought under food crop cultivation.	1550.98
7.	Area of land used for cultivating drought resistant crops (like millets).	182
8.	No. of soil and water conservation structures developed with Sabal food/cash for work.	122
9.	No. of soil and water conservation structures developed with voluntary people's contribution.	48
10.	% Increase in water level (Based on water levels of observation wells)	0.45 mtr

Objective B: 8,000 Households in the project area have increased the protein content of their nutrition through poultry farming, fishponds and effective awareness raising about the need for diversified diet with a long-lasting effect.

No	Indicators	Result Achieved
1.	No. of HHs who have setup backyard nutrition gardens or vegetable farming.	818
2.	No. of HHs using poultry/eggs or fish as part of their diet	1353
3.	No. of HHs preparing local protein mix with locally available food	840

Objective C: Children and pregnant women from the villages in the project region have better access to government support program for nutrition, education and health. The children in the project region have better access to kindergartens and good quality lunch in kindergartens. Malnourished children receive better additional support from state and private program.

No	Indicators	Result Achieved
1.	No. of children newly linked with Anganwadis	64
2.	No. of SAM/MAM cases registered with and supported by NRC	10
3.	Number of children recovered to 'Normal' from SAM/MAM.	90

Objective D: The public distribution system for food supply and the local controlling institutions and user groups in the area reach an improved food supplies coverage in the area. The persons in need improve their access to the services and the quality of the distributed food improves.

No	Indicators	Result Achieved
1.	No. of households reported they received quality food grains in enough quantity from PDS outlets	373
2.	No. of collective actions of communities documented their findings and submitted reports to Gram Panchayat for improvement in PDS system	294
3.	No. of collectives submitted proposals to improve the food security in Gram Panchayats.	425
4.	No. of eligible women received maternal and child scheme benefits	380
5.	No. of households received employment opportunities under MGNREGA	
6.	No of families with children (0-5 years) reported that they received institutional nutrition support	2314
7.	No. of water bodies where Korkus have obtained fishing rights.	04

Objective E: To secure the food supply, especially for the families of migrant workers and chronically ill and otherwise particularly needy persons, as well as to improve the hygiene situation, which will be accompanied by health protection education measures as part of the COVID-19 response.

No	Indicators	Result Achieved
1.	Distribution of food parcels to families in special need	1000
2.	Distribution of hygiene articles, soap, mouthguards, and disinfectants	4023
3.	Supplementary food for the people with special needs	600
4.	Support families of migrant workers to start measures to create own	97

ACTIVITY PHOTOS:

**SAMARTH : BUILDING RESILIENCE FOR WOMEN-HEADED DISTRESSED
RURAL HOUSEHOLDS OF MAHARASHTRA**

SUPPORTED BY : CARITAS INDIA

The Samarth project launched in March 2021, during same time the second wave of the corona-19 Pandemic began to spread. The phases of lockdown were carried out in Maharashtra to control the spread of pandemic. The series of lockdowns led to the poverty of communities and hunger. Second wave of epidemic left a horrible tail many of peoples falling illness, many of lose their lives and many of peoples lost their works so the poverty and hunger to begin. All economic sectors were affected and poor communities suffered severely. The second wave of the Corona pandemic lasted four month which began in march-2021 and ended in july-2021.

In August 2021 when the second wave of the pandemic had become less intensive and the government gradually reduced the restrictions. Samarth started to implement the main activities in the communities for enabling and capacitating the farmer's widows, vulnerable women, women headed families and distressed women. Team of Samarth not only works for the economic well-being of widows. But also help them to achieve more respectable social standing and acceptance in the communities. Therefore, Samarth used befriending and strategy building the confidence of vulnerable women and strengthening. Women from farmer's suicide victims' families are formed into groups so that they released their burdens of networking and communications. Government has several programmes both livelihood and welfare oriented; they are sensitised to government schemes and processes. While they assisted to gain self-reliance in terms of economic needs of family, they also supported to participate as capacitated and empowered. Most vulnerable women helped with seed money for starting micro-enterprises, Petty trades and linked them with government schemes to sustain their trades. - 386 were trained on government schemes and training on application filling.
- **22 women** CBO leaders are capacited on credit management and linkage building through trainings.
- **103** applications submitted to various government department for seeking scheme benefits by Widow federation

▪ **ACTIVITY PHOTOS:**

PROJECT : PROVIDING ESSENTIAL FOOD MATERIALS TO THE COVID-19 VICTIM FAMILIES WITHIN THE DISTRICT OF AMRAVATI, MAHARASHTRA STATE, INDIA

- **SUPPORTED BY:** MANOS UNIDAS
- **INTRODUCTION:**

Covid – 19 has profoundly changed the lives of many. It has caused tremendous human suffering challenging the people’s wellbeing. The pandemic has increased people’s anxiety and worry. The vulnerable and disadvantaged groups have impacted more severely as they had no options to fulfill their basic needs. The situation in isolated tribal villages is grimmer where apart from the fear of Covid-19, people are also dealing with hunger struggling to fulfill the basic needs. The tribal communities in this Melghat region are vulnerable as they don’t have proper homes, adequate income or sufficient resources. They are on the brink of starvation. They suffer from various problems such as Lack of Access to Food and other basic needs. Many of them have almost exhausted their monthly ration supplies and most of them do not have access to avail rations due to lack of awareness. The children would rely on midday meals from schools which have also stopped since many schools have been shut down due to the pandemic. People who migrate to work on construction sites or brick kilns have been cut off from their livelihood as they are not able to move due to travel restrictions. As compared to cities, their access to food is severely restricted. At this juncture the proposed project has helped to respond to the basic needs of the families and give temporary relief to the people and has effectively provided them with sustenance.

- **OBJECTIVES OF THE PROJECT**

- The immediate objective of the proposed project was to provide temporary relief to **310 tribal and Dalit households** through the supply of ration kits which contained essential dry daily provisions. The long-term objective is to help 310 most underprivileged families to survive and find a job for their daily food in the near future once the COVID -19 comes to an end.

- **PROJECT IMPLEMENTATION**

- The staff of Jeevan Vikas Sanstha consulted the local authorities to identify the people who need this help the most. A Survey was conducted in ten villages namely Wazzar, Dhomni Phata, Nimkund, Kohana, Jamli, Bela, Sosarda, Belkheda, Gondvahir and Mueiphatha. These villages are located in the Melghat region of Maharashtra. The local authorities helped us to identify the most needy and vulnerable group. All of them belong to tribal and Dalit communities. With the

financial help received from Manos Unidas we could reach out to 310 families where no Government or NGO has been working until date. The food kits consisted of Rice 5kg, Wheat flour 10kg, Tea powder 250gm, Sugar 2kg, Chili Powder 500gm, Soap 2 pieces, Cooking Oil 2 liters and Masks 5. These food kits helped them to feed their families at least for a month at the same time relieve them from worry and anxiety.

PROJECT : INTERIM PANDEMIC RELIEF RESPONSE IN SABAL INTERVENTION AREAS IN AMRAVATI
SUPPORTED BY : CARITAS GERMANY

The emergency relief programme was implemented in the same villages where the Sabal programme is implemented since last 5 years. The area is well known to the team; therefore, it was easy for the Sabal team for identifying the beneficiaries as per the proposed parameters. With regard to the identification of the persons with comorbidities the help was sought from the medical representatives and Anganwadi workers. The prioritization of the mothers and children were done based on the available list with the Sabal community facilitators.

● **PROMOTING COVID-PREVENTION BEHAVIOUR**

No	Indicator	Target Value	Result Achieved
1.	No. of Covid awareness campaigns organized	51	51
2.	No. of information dissemination through IEC materials, Wall paintings etc	33	33
3.	No. of Covid care kit distributed to covid-19 affected vulnerable families	51	51
4.	No. of beneficiaries motivated for getting vaccination	1200	1500
5.	No. of ailing community members identified and provided with medical assistance	2000	2348

● **CASH/FOOD FOR WORK TO VULNERABLE HOUSEHOLDS**

No	Indicator	Target Value	Result Achieved
1.	No. of soil water conservation structures developed with support of project	60	54
2.	No. of voluntary structures constructed by the community	-	-

● **FOOD/NUTRITION SUPPORT TO CHILDREN AND PERSONS AT RISK**

No	Indicator	Target Value	Result Achieved
1.	No. of severely malnourished children benefitted with nutrition kit	600	600
2.	No. of high-risk ANC/PNC mothers benefitted with nutrition kit	400	400
3.	No. of persons with comorbidities identified and supported with nutrition kit	400	400

PROJECT : PROVIDING ESSENTIAL FOOD MATERIALS TO THE COVID-19 VICTIM FAMILIES WITHIN THE MISSION DIOCESE OF AMRAVATI
SUPPORTED BY: MISSIO, Aachen

Following the completion of a 6 month's project to the covid-19 victims, Jeevan Vikas Sanstha, once again applied to MISSIO,Aachen, for another project as a continued support to the starving families. The project was sanctioned by Missio and Euros 45.000,00 was sanctioned to provide food grains to 300 poor families within the diocese of Amravati.

Selection of Beneficiaries: Even though there were several hundreds of needy people, we had to limit the number keeping in mind the most vulnerable people under various criteria as per the project application. Thus the selections of 300 families were done with the help of local parish priests and the staff of JVS in different locations within the diocese of Amravati. We recognized 11 most needed locations where people are suffering most. From among them we selected 300 families who were denied of their basic food materials during the last few months. The following chart will show the number of beneficiaries in different locations.

Sr. No.	Parishes/ villages	Number of families	Sr. No.	Parishes/ villages	Number of families
1	Paratwada	16	7	Chikhaldara (Amzeri village)	30
2	Duni	34	8	Malkapur	40
3	Kapustani	30	9	Akola	30
4	Anjangoan Surji	30	10	Washim	30
5	Akot	30	11	Rasegaon	03
6	Chikhaldara (Mariampur village)	27		Total	300

Project implementation

The proper implementation of the project took place after finalizing the beneficiary list with the local partners. The list of the selected beneficiaries from each parish was approved by the JVS team after verifying the real life situation in different locations.

The next step was to finalize the food items that are essential to each family. Thus after consulting with the partners and the beneficiaries, we decided to purchase basic food items such as wheat flour, rice, tea powder, chilli powder, sugar, pulses, edible oil etc. Various vendors were asked to submit the cost estimate and after studying the quotations submitted by different provision vendors, we gave order as per the quantity mentioned in the project application and approved by the agency. In fact, the prices of major food items had gone higher than what was budgeted in the project. Therefore we decided to purchase and supply food materials for two months together, instead of every month so that some money could be saved from transportation. Thus the money saved by transportation was used for supply of extra food items.

The packing of the food kits were done by different labour with the help of coordinator and other staff of JVS. They made sure that every kit contained exact quantity of provisions. After packing the food items it was separated as per the number of beneficiaries in each village.

Project impact

Around 1800 people from 300 starving families of 10 parishes/villages were given new life and good health through the project. The situation was very critical for these families and at the completion of this project many of them are able to find some daily income for their survival. Due to the distribution of the food kits to the neediest people of these villages, 300 households were able to get temporary relief from their suffering. They were able to search for alternative works. People who lost their daily jobs due to the Corona virus and subsequent lock-down were in a very miserable situation. Such people benefitted from this project most. They expressed their gratitude to Missio, Aachen and all its benefactors for their generous and kind good will and solidarity with the suffering humanity. As a whole we can say that the expected outcome of the project is 100 % successful.
